About

Young multidisciplinary designer, I'm specialized in designing and coding websites. I work on a variety of self-commissioned projects as well for small structures. I help them to get their own place on the web, to show their work or their ideas.

Born in Spain, I came to France at the age of 13 to pursue my studies. Ten years later I'm finishing a double master in UI and UX in Amiens. Now I'm looking for an internship on web development in Rotterdam!

Last web projects

Commissioned - [Collaborative Narratives](#) - Photography archive from a collaborative fashion project

Personal - [The web we want](#) - Thesis project about handmade web
